SUMMARY

Customer-facing engineer who builds what the field needs. I guide schools and organizations through large Apple deployments, then turn what I learn on those calls into working tools, from AI assistants grounded in real customer data to secure integrations that connect AI to the systems teams already use.

EXPERIENCE

Deployment Systems Engineer Apple Inc.

2023 – Present

- Guide K-12, higher education, and state and local government customers through large-scale Apple deployments, covering MDM, identity and single sign-on, and zero-touch enrollment.
- Consistently deploy customers faster than the team average while carrying a full caseload.
- Designed and built an AI-powered browser extension that centralizes case data, email templates, and scheduling. Its AI assistant is grounded in each customer's full history, the deployment process, and the engineer's role. Used daily across the deployment team.
- Designed and built Cornerstone, a custom FileMaker Pro platform that connects Calendly, internal systems, and communication tools into a single pane of glass for managing customer engagements.
- Engineered a CRM MCP server that gives AI assistants a secure, permissioned connection to customer records, which wasn't previously possible. Also built automation tools with Python, APIs, and Shortcuts adopted across multiple teams.

K-12 Systems Engineer Apple Inc.

2020 – 2023

- Supported school districts across Georgia as a trusted technical advisor for Apple deployments.
- Partnered with sales teams to remove technical blockers and support customer acquisition strategies.
- Delivered technical workshops and deep dives on MDM, macOS deployment, and Apple School Manager.
- Built automation tools to improve internal workflows and customer engagement processes.

Senior Systems Engineer Manhattan Associates

2020

- Rebuilt the macOS enrollment experience using Octory, improving transparency and user experience during device setup.
- Designed a zero-touch deployment workflow integrating Jamf, Okta, and onboarding tools.
- Trained and mentored engineers on Apple device management and Jamf best practices.
- Provided high-touch support for executives and critical systems.

Jamf & Apple Systems Engineer Equifax (Tata Consultancy Services)

2019 – 2020

- Built global Jamf Pro Cloud deployment architecture, migrating from on-prem infrastructure to a more scalable model.
- Designed standardized enrollment workflows and configuration profiles for global device management.
- Implemented Apple content caching strategy across regions to improve performance and reduce bandwidth usage.
- Developed a Python-based macOS LAPS solution for secure admin credential management.

MDM Systems Administrator Clinton Public School District

2013 – 2019

- Owned end-to-end Apple device management strategy for the district.
- Built automation workflows using scripting and APIs to improve IT efficiency.
- Developed internal tools and dashboards to support deployment and operations.
- Managed vendor relationships, inventory, and lifecycle processes.

Genius Apple Inc.

2010 – 2013

- Delivered advanced troubleshooting and repair across the Apple product ecosystem.
- Trained customers and internal team members on Apple technologies.
- Recognized for leadership and technical expertise.

PROJECTS

AI-Powered Browser Extension Case data, templates, scheduling, and an AI assistant that knows each customer's history, the deployment process, and the user's role.

Cornerstone Custom FileMaker Pro platform that unifies scheduling, internal systems, and communications into one view of every customer engagement.

macOS LAPS Tool Python-based tool for securely managing admin credentials in enterprise Apple environments.

Home Assistant + AI Automations Smart home workflows that combine local systems with AI-driven triggers and integrations.

SKILLS

Forward deployment Technical discovery and scoping · Rapid prototyping · Turning field feedback into tools · Customer workshops and training · IT leadership stakeholder management · Technical documentation

Device management Jamf Pro · Jamf School · Microsoft Intune · Mosyle · Apple School Manager · Apple Business Manager · Apple Configurator · Zero-touch enrollment · Jamf Connect

Identity and security Okta · Microsoft Entra ID · Google Workspace LDAP · SSO and federation · MFA · FileVault

Engineering Python · Bash · JavaScript · TypeScript · Swift and SwiftUI · PHP · FileMaker Pro · REST APIs · Browser extensions · Salesforce APIs and CLI · Git and GitHub

AI engineering MCP server development · Agent skill authoring · LLM integration · Tool and function calling · Prompt engineering · Multi-agent orchestration · Workflow automation

EDUCATION

Associate of Applied Science, Computer Networking Support Technologies
Hinds Community College

Jamf Certified Administrator · Jamf
Apple Certified Mac Technician · Apple
